April 10, 2014

Dear Resident:

On Wednesday, April 23, 2014, Marine Biochemists intends to apply an entire lake volume treatment to Grays Lake. The treatment is intended to selectively eradicate the exotic millfoil and curlyleaf pondweed, while preserving the native plant species within the lake. The rain date will be April 24, 2014.

**WATER USE RESTRICTIONS** in effect following the treatment will be three (7) days swimming, three (7) days fish consumption and thirty (30) days irrigation. As per the Grayslake Management Committee specifications, public access points to the lake will be clearly posted with **WATER USE RESTRICTION NOTICES**.

Weather and/or high water levels may postpone the treatment. Marine Biochemists will notify the Grayslake Park District in the event of treatment postponement. Should you need additional information or would like confirmation that the treatment did occur on April 23, please contact Jeff Nehila (Park District) at (847) 223-7529.

**Second Weed Control Application This Year:** A second application to target specific invasive plants may be applied later this year. This application will not have any restrictions for swimming, fish consumption or irrigation. You will also be provided notice in advance of this application if it is needed.

**Lake Clean-Up Event:** The Grayslake Community Park District will be conducting its 4th Annual Lake Clean Up day on June 7, 2014 from 9:30 am to noon to clean up selected areas of the shoreline. If you'd like more details on how to participate in the event, please contact Jeff Nehila (Park District) at (847) 223 - 7529.
